YOUR GLASS COCKPIT SOLUTION

NO MORE DOUBT'S ABOUT FLIGHT!

TL ELEKTRONIC INC.

Millions of people around the world use the car camcorder to record situation in front of car, which can be essential proof in case of any accident.

Now you can use the same philosophy also for your aircraft. For the fraction of price, you can get robust flight recorder similar to used in the Airbus or Boeing, that will securely record all measured parameters by Integra Glass Cockpits, for example engine and flight data including position of moving control levers, fuel level quantity, GPS position and others.

Smallest crash-protected solid-state recorder is intended for safe recording history of data on-board an aircraft. It provides essential data especially for flight schools and aircraft owners.

Track your aircraft!

Weight : 750 grams

Size: 120x50x70mm (w x h x d)

Power Supply : 9 to 32 Volts

Consumption: 70mA @ 14 Volts

Recording Duration: ca. 25 flight hours

Operating Temperature Range: -40 °C to +70 °C

Fire Intensity: 800°C flame for 10 minutes

Impact Shock: 1000 Gs for 6.5 ms

Water Immersion: Immersion in sea water for 15 days

MAKES YOUR FLYING SAFER
